

Improving Condition with Sumo Supplements

Sumo Original was one of the first products created within the Rowen Barbary Horse Feeds range over 30 years ago, a high oil supplement that is as effective today and it was then.

Providing super high levels of oils and fatty acids Sumo Original is an extremely valuable feed for all horses from youngsters to veterans, especially when trying to perfect the condition and enrich the bloom in the coat. When feeding a significant amount of oil to the horse it is important to support the diet with the correct nutrients, specifically antioxidants, Vitamin E and C along with Selenium and Zinc to allow the horse to utilise the oil efficiently.

As Sumo Original also has a very low starch and sugar content and is cereal free it is especially useful to use on laminitics that need a safe way to gain weight and condition, or for horses that need a cereal free diet.

After much research Rowen Barbary developed a second conditioning product to join the Sumo Supplements range, Sumo MB.

Sumo MB contains a unique blend of milk powders, breakfast cereals, highly digestible protein sources, glucose, oils, vitamins, minerals and trace elements to help achieve optimum development in show and working horses and for rapid improvement in horses that have lost condition.

Using good quality protein sources that provide essential amino acids helps support the formation and repair of muscle tissue, encouraging overall muscle tone and development and helping improve topline.

Coconut oil is also included which helps improve stamina in working horses, as well as creating a great coat gloss and helps make the Sumo MB very palatable for even the fussiest of horses.

Sumo MB will also help provide the extra energy needed for horses working hard.
