

Scottie's Return to Health

Here at Rowen Barbary we are lucky enough to hear the many success stories that people have had from feeding our products, but when Emily Mayman contacted the office regarding her pony Scottie we were so overwhelmed by her experience that we decided we would share her story;

Scottie had poor teeth, an infection in his digestive tract and was suffering from malabsorption when the first vet wrote off his problems due to 'old age'. Emily then went to a second vet who was fantastic with him and Scottie went onto antibiotics.

He couldn't eat hay at all and struggled to even eat a short chop and Emily tried every food she could get her hands on for Scottie, but he just could not manage it. He had come to be very underweight, but it was getting worse and worse and he was growing increasingly poorly so it was decided that he had a week left to show some improvement.

Emily and her partner fled to her local tackshop and explained the problems she was having when it was recommend that she try ReadyMash Extra. The first night he had the feed, Scottie actually whickered for his tea - something he had never done and he slowly munched through

the whole bowl of food. Going down to the yard the next day, Emily was expecting to be trying to sort through his 'runs' in the stable, yet to her surprise, a solid dropping!

Over the next week Scottie slowly munched his way through the feed and within just a few days he seemed a bit happier. Her vet was really pleased! Over the next 6 months he stayed on the feed, and fantastically put on 60kg - the weight he had lost. He had a new spark come to him that Emily had not seen before. He is 32 this year, is still on ReadyMash Extra, and still loves it. He now gallops and frolics around the field with her 5 and 8 year old. He never did this before Emily feels that the ReadyMash Extra saved him.
